

SHAPES FORM SQUARE

Surface, Suspension, Recessed

Form SQUARE is a versatile family of low-profile luminaires available as surface, suspension or recessed mount. With multiple sizes, depths, finishes, and control options, the collection delivers uniform, flicker-free illumination ideal for commercial, hospitality, and architectural environments. Its flexible specification options make it easy to integrate Form SQUARE into a wide range of ceiling conditions and design intents.

Key Features

- Size Range: Standard size from 18.9"– 47.2"
- Flexible Ordering: No minimum order quantity — single fixtures available
- High Performance: 100 lm/W, 90+ CRI
- Mounting Options: Suspension or surface
- Driver Options: Built-in driver or remote ceiling box
- Light Quality: Uniform, flicker-free illumination
- Durability: 5-year warranty
- Finishes: White, Black, Silver, Gold, or Custom RAL
- Electrical: 100–277V universal input
- Control Options: 0–10V, Tunable White
- Accessories: Emergency battery backup
- Ease of Installation: Streamlined, contractor-friendly setup

Optics	Polycarbonate diffusion panel
Distribution	Direct (down light)

Finishes

Luxformae's Shapes collection offers designers a high level of material flexibility—allowing acoustic treatments, 3D-printed textures, and premium profile finishes to be used independently or in combination. Profiles may be finished in any of our colors or material textures, wrapped in acoustic material, or specified with both acoustic and textured elements together, creating the precise balance of performance and visual expression required. With an extensive palette ranging from sophisticated neutrals to bold, playful tones, Shapes enables refined architectural statements as well as more whimsical, color-driven compositions. Whether the goal is visual warmth, sound control, or a distinctive material identity, designers can tailor each fixture to perfectly support their project vision.

Profile Colors

Shapes provides a wide range of profile finishes to help designers achieve the exact visual expression their project requires. Options include powder coating, sandblast painting, anodized brushing, plating, and custom RAL colors upon request. These techniques offer everything from sleek, refined surfaces to more expressive or character-driven aesthetics, ensuring each fixture aligns with the intended design vision.

Texture Colors

Shapes offers 3D-printed textured surfaces that emulate natural materials such as travertine, wood, and earth. These textures may be applied to the outer profile or specified as a center panel, bringing depth, warmth, and a tactile design presence to the luminaire. Each texture is crafted to capture the richness of the original material while maintaining the durability and precision required for architectural lighting.
